Introduction – Kevin L Wallace, AIA

Kevin Wallace is the “Dream Designer,” a nationally licensed architect who learned at a very young age the impact quality architectural design has on how we live, work and play. When Wallace sits down at his drafting table, he first envisions the beauty and art of his design. Whether designing an office set-up or the most magnificent structure in a skyline, Wallace is out to reveal the beauty and evoke wonder in every design. He has a vast amount of experience in both the commercial and residential arenas and will share personal stories of both clients, respectively.

Wallace earned a Bachelor of Architecture degree from Virginia Polytechnic Institute and State University. After developing his design and business talents working for several firms in the Dallas area, Wallace founded *Wallace Design Group* in 1996 and operated it until 2009. In 2009 he merged *Wallace*

Design Group with *Sykes Construction, Inc.* where his talents and expertise are combined with the professionals at *Sykes Construction, Inc.* to form a design and construction solution firm. He can still be found sketching designs on the drafting table and t-square handed down to him by his father.

Wallace intends to help you look at life with a slightly new perspective. Whether you are simply a consumer in a new restaurant or embarking on a new business venture, his perspective and wealth of knowledge will serve as an amazing guide for the world of construction and design. All of us are impacted by architectural design, whether we are acting as consumers or building our own home or business.
